INTRODUCING TECHNOLOGY BY NATURE

Our proprietary bio-frequency signatures are tuned by nature and boost yields, save water, and enhance and reduce inputs.

DESIGNED FOR:

Irrigated Farming • Dryland Farming • Controlled Environments • Livestock
Row Crops • Corn • Soybeans • Cotton • Small Grains • Peanuts • Grass Forages
Alfalfa • Canola • Specialty Crops • Almonds • Rye • And More

TERRASCRIBE+™

In-line irrigation solutions
structure & imprint water
with biochemical signals to
enhance fertilizers and soil
amendments

TERRACELL™

Enhanced field
management and digital
input signaling to improve
crop health, deter pests and
reduce inputs

HIGHLIGHTS

Can withstand up to 2500GPM • Doesn't affect flow rate or pressure • Available in 1" to 12" pipe sizes • Customized programs • Library of digital amendments • Remote digital bio-signaling solutions

LESS THAN ONE YEAR PAYBACK | FLEXIBLE PAYMENT OPTIONS
